

LiveQueue postcard test - 500 labels

Five segments of 100 clinics each, drawn from the Kerala Register of Clinical Establishments (KSCCE), as on 01.08.2026. Print on A4, cut along the boxes, paste one on each cover. Ten labels per sheet, ten sheets per segment.

Segment	Pages	Why it is in the test
S1 Polyclinic	2-11	Several doctors sharing one reception — the closest fit.
S2 Clinic (Modern)	12-21	General practice OP, walk-in, modern medicine.
S3 Homeopathy	22-31	High-volume walk-in OP, usually a single doctor.
S4 Ayurveda clinic	32-41	Waiting rooms, but more treatment-slot than queue.
S5 Dental	42-51	Biggest segment by far, weakest fit on paper. Worth knowing.

Tracking

The reference code in the corner of each label (S1-001 ...) tells you which segment a card belongs to. Note the code before you post it. When a clinic signs up, the segment that produced it is what decides where the next 2,000 cards go.

Labels carry no PIN where the register gave none and no reliable match was found. India Post will still deliver on the place name and district, just more slowly.
