

LiveQueue postcard test - 399 labels

Five segments of about 80 clinics each, drawn from the Kerala Register of Clinical Establishments (KSCCE), as on 01.08.2026. Print on A4, cut along the boxes, paste one on each cover. Ten labels per sheet.

370 of the 399 carry a PIN code. The remaining 29 name their post office instead, which India Post sorts by hand - delivered, just a few days slower. Clinics whose registered address gives neither are left out of the test.

Segment	Pages	Why it is in the test
S1 Polyclinic	2-9	Several doctors sharing one reception — the closest fit.
S2 Clinic (Modern)	10-17	General practice OP, walk-in, modern medicine.
S3 Homeopathy	18-25	High-volume walk-in OP, usually a single doctor.
S4 Ayurveda clinic	26-33	Waiting rooms, but more treatment-slot than queue.
S5 Dental	34-41	Biggest segment by far, weakest fit on paper. Worth knowing.

Tracking

The reference code in the corner of each label (S1-001 ...) tells you which segment a card belongs to. Note the code before you post it. When a clinic signs up, the segment that produced it is what decides where the next batch goes.

S1 Polyclinic and S3 Homeopathy are small on purpose: the whole Kerala register holds only 102 polyclinics and 118 homeopathy establishments, so these batches are most of their universe. They can prove the hypothesis but cannot be scaled into -- if either wins, the follow-on batch has to come from S2.
